The Residential and Commercial Electricity Diploma program provides students with the skills necessary for an entry-level job as an electrician. Thorough technical instruction is given in the layout, assembly, installation and troubleshooting of fixtures, devices, services, heating systems, pumps, motors and motor controls used in residential, commercial and some industrial locations. The students learn electrical theory and the techniques of the trade, including: blueprint reading, wiring, pipe bending, motor control, and switching power circuits. Emphasis is placed on meeting the requirements of the National Electrical Code in all wiring installations.

Successful completion of the courses qualifies the student to take the State of Maine Journeyman's examination, receive 4,000 hours towards journeyman license, and to enter employment under a Master Electrician. Upon passing the state examination, students are issued journeyman-in-training licenses. Graduates may find employment opportunities with electrical contractors, electrical equipment suppliers, and industrial maintenance companies.

Placement in MAT106, College Math for Technology or a graduate of a Regional Technical Center Electrical Program or equivalent or pass high school algebra with a C or better is required for admittance into the program. Students are assessed using the Accuplacer.

Visiting the campus is easy. Contact the Office of Admissions at 207-454-1000 or admissions@wccc.me.edu to schedule a time to visit the Residential and Commercial Electricity program! For more program specific information, please contact the program instructor Gilbert Murphy, gmurphy@wccc.me.edu, 207-454-1071.

Washington County Community College is an equal opportunity/affirmative action institution and employer. For more information; please call Tatiana Osmond, Affirmative Action Officer, at 454-1040

Residential and Commercial Electricity Technology

Diploma – 45 credit hours
